

# Key Messages of the Mediterranean at the World Water Forum BALI 2024

## Water Security and Prosperity

Creation of a Worldwide Observatory of Non Conventional Water Resources and Renewable Energies.

## Water for Humans and Nature

Analyze uses (real needs) according to the available water mix capacity with a 30-year protection and regeneration plan.

➤ Sewage public services becomes resources services

- Resource of water
- Resource of energy
- Resource of fertilizer
- Resource of health control

## Disaster Risk Reduction and Management

Implement in each region modern tools for knowledge and forecasting of the impacts of the climate change on water management (floods and droughts) allowing adaptation and risk management.

## **Governance, Cooperation and Hydro-diplomacy**

Develop cross-border hydro-diplomacy actions and apply the method to inter-basin solidarity in the same country as well as the conflicts of use between sectors of activity in the same sub-basin.

## **Sustainable Water Finance**

Creation of a “Global Water Fund” in each region of the world and boost blended finance to face the SDG6 thanks to the awareness of the “Water Risk” by large water consumers (water footprints).

## **Knowledge and Innovation**

Prioritize innovations, technological and regulatory solutions, adapted to produce more and consume less. Resources-protection, Mix-hydric, Sobriety and Performance.

**Alain MEYSSONNIER**

President of the IME and pre-governor of the World Water Council

Marseille, 15 March 2024
